

# MOHAN SAGAR KILLAMSETTY

## Senior Software Engineer (AI & Frontend Systems)

mohansgr3@gmail.com • Hyderabad, India (Remote-ready) • [linkedin.com/in/mohansagark](https://www.linkedin.com/in/mohansagark) • [devmohan.in](https://devmohan.in)

### SUMMARY

I am a Senior Software Engineer with 9+ years of experience building AI-powered products and high-performance frontend systems at scale, specializing in LLM integrations, agentic workflows, and real-time interactive interfaces. I combine frontend architecture expertise (React, Next.js) with backend and AI engineering (Python, Node.js, FastAPI) to ship products that solve real business problems. At Invesco, I led development of IVYGPT, an internal AI platform used by 8,000+ users that cut financial report analysis time from 30 days to 30 minutes. At Reliance Jio, I led a team of 10 engineers building consumer platforms serving 5M+ users, improving performance by ~90% and contributing to a 55% increase in digital service sales.

Currently at ServiceNow, I build agentic AI platforms focused on reasoning-trace visualization and voice-enabled workflows, integrating Amazon Connect across CCaaS providers and contributing to the Karuna design system. I enjoy owning problems end-to-end — from architecture decisions to shipped, measurable impact — across AI product experiences, scalable system design, and real-time interfaces. I'm open to remote opportunities (India/global) where I can contribute to impactful products with a strong engineering culture.

### SKILL SET

#### AI & LLM Engineering

LLM Integrations, Prompt Design, Agentic Workflows, Document Summarization, Reasoning Visualization

#### Backend & APIs

Node.js, FastAPI, Python, PostgreSQL, Prisma, Integration Architecture

#### Domain Knowledge

Financial Analysis, Banking & FinTech, Telecom Digital Platforms

#### Frontend Architecture

React, Next.js, TypeScript, JavaScript, Tailwind CSS, Micro-Frontends, Design Systems

#### Systems & Cloud

Real-Time Systems (WebSockets), AWS (API Gateway, CloudFront), Amazon Connect (CCaaS)

#### Leadership

Team Leadership (10+ engineers), Mentorship, Technical Interviewing

### EXPERIENCE

#### Senior Software Engineer (AI & Frontend Systems) — ServiceNow

Aug 2025 – Present (1 yr) · Hyderabad

**Enterprise AI & Agentic Platforms** Global cloud software company powering digital workflow automation for large enterprises.

- Leading UX architecture for AI-powered agentic platforms, **enabling enterprise clients to adopt agentic AI workflows** with minimal ramp-up and lower onboarding friction
- Built reasoning-trace visualizations that **cut AI-decision debugging time** for engineering teams, giving clear visibility into agent behavior
- Developed a voice-enabled interaction layer using Amazon Connect, **unifying integration across multiple CCaaS providers** and removing per-provider integration overhead
- Contributing to the Karuna design system, **standardizing UI components platform-wide** and accelerating frontend delivery across teams

#### Senior Software Engineer — Invesco

Jul 2024 – Aug 2025 (1 yr 2 mo) · Hyderabad

**AI for Asset Management** Global independent investment management firm serving institutional and retail clients.

- Led development of IVYGPT, adopted by **8,000+ users**, becoming a core tool in daily fund research workflows
- Reduced report analysis time from 30 days to 30 minutes (**~99% efficiency gain**), directly accelerating fund management decision cycles
- Built a document summarization system plus reusable AI workflows/prompt libraries, **cutting redundant manual work** across teams
- Enabled users to create custom AI tools via contextual prompts and implemented micro-frontend architecture + backend APIs, **scaling AI feature delivery** without added headcount

## SDE-3, Senior SWE — Jio Platforms Limited (Reliance Jio)

Sep 2022 – Jul 2024 (1 yr 11 mo) · Bengaluru

**Telecom / Consumer Platforms** India's largest telecom and digital services provider, part of Reliance Industries.

- Led a team of 10 engineers building platforms serving **5M+ users** at scale, ensuring reliable delivery across high-traffic services
- Increased digital service sales by **55%** through platform enhancements — a direct, measurable revenue contribution
- Improved page load performance from ~5s to ~500ms (**~90% faster**), reducing drop-off and lifting user experience at scale
- Enabled **200,000+ user conversions** through Google Ad Manager campaign integrations, driving measurable growth in acquisition
- Introduced micro-frontend architecture, **cutting inter-team dependencies** and raising deployment velocity; conducted 50+ technical interviews supporting team scaling

## Senior Software Engineer — Zentree Labs

Feb 2021 – Sep 2022 (1 yr 8 mo) · Srikakulam

**Banking / Real-Time Systems** Software company delivering web and mobile applications for banking and enterprise clients.

- Built web and mobile applications for banking and operational systems, **giving the client reliable digital tooling** for daily financial operations
- Developed cross-platform apps using React Native, **cutting development effort** by reusing a single codebase across web and mobile
- Implemented real-time monitoring and analytics features, **giving operations teams live visibility** into system health and faster incident response
- Integrated APIs and ensured reliable data flow across distributed systems, **improving data consistency** across the client's banking platforms

## Software Engineer — Shell

Mar 2019 – Dec 2020 (1 yr 10 mo) · Bangalore

**Energy / Enterprise Systems** Global energy and petrochemical company operating across exploration, refining, and marketing.

- Delivered an OTP-based solution enabling ship maintenance operations to continue during COVID-19 lockdowns, **sustaining critical business operations** when on-site access was restricted
- Ensured business continuity by enabling secure remote access and workflow execution across distributed teams
- Collaborated closely with business stakeholders to deliver high-impact features on tight timelines, **supporting uninterrupted operations** during a critical period

## Application Development Associate → Analyst — Accenture

Jan 2017 – Mar 2019 (2 yr 3 mo) · Bengaluru

**IT Services / Telecom Delivery** Global professional services company providing IT consulting and outsourcing (clients: AT&T, Mobily).

- Handled 4 AT&T projects across 25+ sprints, raising 200+ defects and **preventing them from reaching higher environments**, protecting release quality
- Adopted test automation tools (Selenium, UFT), **cutting regression effort by 70%+** and freeing up QA capacity for higher-value work
- Improved productivity by 25% and efficiency by 30% by **eliminating typo and human errors** in delivery workflows
- Recognized as Star Performer at Mobily for Go-Live and UAT execution across 12 projects, **catching 300+ defects** before production

## EDUCATION

### B.Tech, Mechanical Engineering — Vellore Institute of Technology

Jun 2012 – May 2016

## CERTIFICATIONS

- React: Software Architecture
- AMD: AI Developer
